Meeting logbook Entry Sheet

BSc. Project Logbook

Student Name: Saphal Chudal **LMU ID: 23049987**

Meeting No: 18 **Start Time: 10:00 A.M**

Date: 2026-04-05 **End Time: 11:00 A.M**

Items Discussed:

1. Review of Unit Testing progress
2. API testing of major system endpoints
3. Discussion on testing coverage and results
4. Feedback on improving test documentation

Achievements:

Unit testing and API testing were conducted for several core modules of the system. The supervisor reviewed the testing approach and confirmed that the implemented tests help validate key functionalities such as authentication, project management, and communication features. This ensured that major parts of the system are functioning correctly and reliably.

Problems:

During testing, a few minor issues were identified with API responses and error handling in certain endpoints. Some test cases also needed better documentation and organization to clearly demonstrate testing coverage for the system.

Tasks for the Next Meeting:

1. Perform overall system review
2. Conduct complete system testing
3. Prepare remaining project documentation
4. Finalize testing reports and records

Internal Supervisor Name: Kushal Tamang

External Supervisor Name: Abhinab Shrestha
